EELLSS at a glance

EELLSS stands for European Experiential Learning Lab on Soil Science and is a 2-year project (01-09-2015 - 31-08-2017) funded by the ERASMUS+ Programme. The EELLSS consortium aims to develop a comprehensive, versatile and extendable approach to integrate soils as a substantial learning field in European school education.

Soils and the connected soil sciences offer rich and contextualised learning environments for basic and science education, for practical and problem based learning and for interdisciplinary learning projects. They also differ from region to region, influence and shape the local and regional environment and climate and offer an interesting field for practical comparative research for students. Despite their interdisciplinary and practical potentials, soils have hardly ever been thoroughly introduced in school education, except maybe in vocational agricultural schools. In this situation, EELLSS aims to include soils and soil science in curricular and extracurricular activities and will do this by applying a competence oriented learning approach. EELLSS addresses teachers and educational professionals, pupils and students, schools, education institutes and informal learning providers, European stakeholders dealing with school and environmental policies and course providers.

EELLSS launches its website!!

EELLSS launches its website where you will be updated on current and forthcoming activities and publications. Stay tuned to learn more about our future training course!
